

## EURO AREA SECURITIES ISSUES STATISTICS: JANUARY 2002

In January 2002, euro area residents issued debt securities in the amount of EUR 650.8 billion (see Table 1 and Chart 1). As redemptions totalled EUR 567.6 billion, net issuance amounted to EUR 83.2 billion in that month. Euro-denominated debt securities accounted for 94.9% of total gross issuance by euro area residents. The largest proportion (61%) of the euro-denominated debt securities was issued by Monetary Financial Institutions (see Table 2 and Chart 2). The remaining issuance activity was shared between general government (25%), and non-monetary financial corporations with non-financial corporations (together accounting for 14%).<sup>1</sup>

Chart 1 – Total gross issuance of debt securities by euro area residents (*EUR billions, transactions during the month, nominal values*)

Chart 2 – Total gross issuance of euro-denominated debt securities by sector of the issuer (*as a percentage of the total, based on transactions during the month, nominal values*)

Source: ECB securities issues statistics.

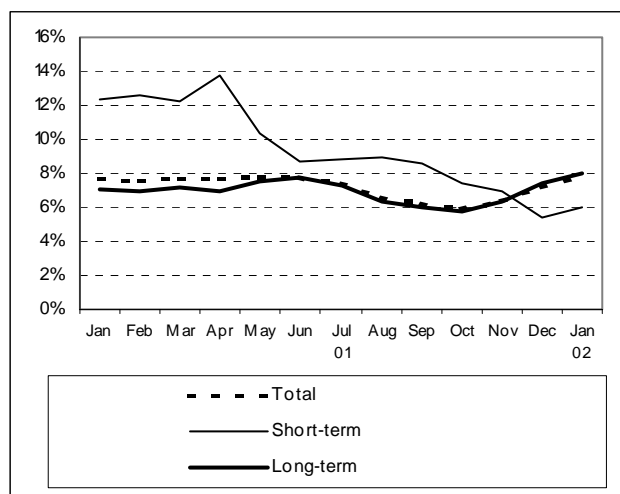

<sup>1</sup> The sector classification is based on the ESA 95 (sector codes in brackets): Monetary Financial Institutions include central banks (S.121) and other monetary financial institutions (S.122); non-monetary financial corporations comprise other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); general government refers to the central government (S.1311) and other general government, the latter comprising state government (S.1312), local government (S.1313) and social security funds (S.1314).

The annual growth rate of the amount outstanding of debt securities issued by euro area residents rose to 7.8% in January 2002, from 7.2% in December (see Table 1 and Chart 3). The annual growth of the amount outstanding of short-term debt securities issued by euro area residents increased to 6.0% in January 2001, from 5.4% in the previous month. For long-term debt securities, the annual growth rate rose to 8.0% in January 2002, from 7.4% in the previous month.

Turning to the sectoral breakdown of the issuance of euro-denominated debt securities (see Table 2 and Chart 4), the annual growth of the amount outstanding of euro-denominated debt securities issued by the general government sector increased to 4.6% in January 2002, from 3.4% in December. In the Monetary Financial Institutions sector, which accounts for the largest part of outstanding non-government issues, the annual growth rate declined slightly to 5.0% in January 2002, from 5.6% in December. In the non-MFI corporate sector, which includes both the non-monetary financial corporations and the non-financial corporations sectors, the annual growth rate of the amount outstanding rose in January 2002 (to 29.5%, up from 27.4% in December). Within this sector, the growth rate in the amount outstanding of euro-denominated debt securities issued by non-monetary financial corporations rose from 41.2% in December 2001 to 42.5% in January. At the same time, the annual growth rate of the amount outstanding of euro-denominated debt securities issued by non-financial corporations increased from 18.0% in December 2001 to 20.5% in January.

Chart 3 – Debt securities issued by euro area residents by original maturity (annual percentage changes based on nominal end-of-period stocks)

Chart 4 – Euro-denominated debt securities issued by euro area residents by sector of the issuer (annual percentage changes based on nominal end-of-period stocks)

1) From 1 January 2001, Greek data are included. Data coverage for euro area residents is estimated at around 95% of total issuance.

2) Including items expressed in the national denominations of the euro.

3) "Short-term" means securities with an original maturity of one year or less (in accordance with the ESA 95, in exceptional cases two years or less). Securities with a longer original maturity, with optional maturity dates the latest of which is more than one year away, or with indefinite maturity dates, are classified as long-term.

4) All growth rates refer to the euro area including Greece. Rates of change are calculated from amounts outstanding and are not adjusted for revaluations, reclassifications or other changes which do not arise from transactions.
