## PRESS RELEASE

# EURO AREA SECURITIES ISSUES STATISTICS: April 2003

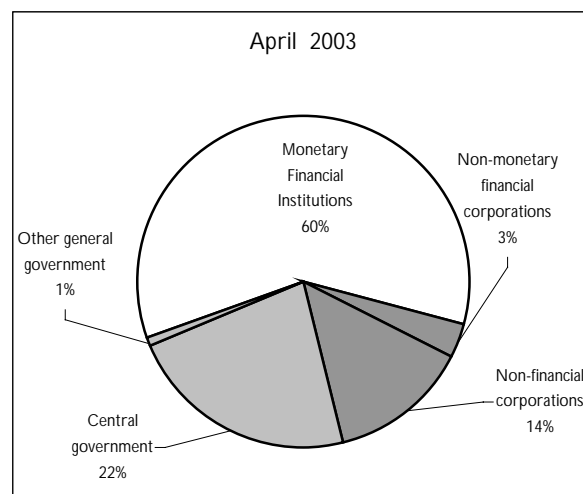

### Debt securities

In April 2003, euro area residents issued debt securities totalling to EUR 633.9 billion (see Table 1 and Chart 1). As redemptions were EUR 579.9 billion, net issues amounted to EUR 54.1 billion. The annual growth rate of the amount outstanding of debt securities issued by euro area residents increased slightly, from 6.9% in March to 7.0% in April 2003 (see Table 1 and Chart 3).

**Chart 1 – Total gross issuance of debt securities by euro area residents** (EUR billions, transactions during the month, nominal values)

**Chart 2 – Total gross issuance of euro-denominated debt securities by sector of the issuer** (as a percentage of the total, based on transactions during the month, nominal values)

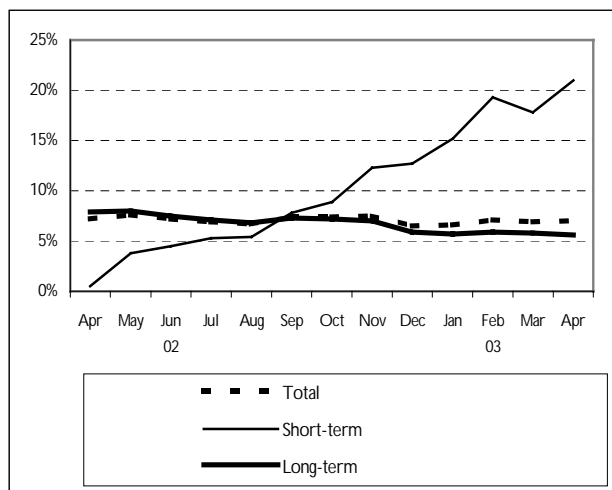

Source: ECB Securities Issues Statistics.

In April, euro-denominated debt securities accounted for 94% of the total gross issuance by euro area residents. 60% of the euro-denominated debt securities was issued by Monetary Financial Institutions (see Table 2 and Chart 2). The remaining gross issuance of euro-denominated debt securities was shared between general government, accounting for 23%, and non-monetary financial corporations and non-financial corporations, together accounting for 17%.<sup>1</sup>

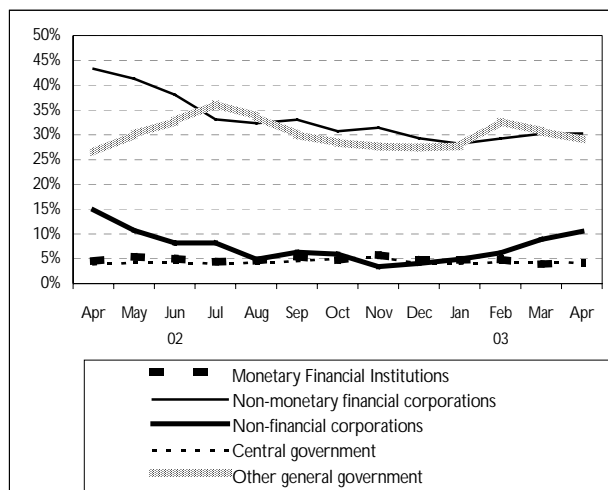

<sup>1</sup> The sector classification is based on the ESA 95 (sector codes in brackets): Monetary Financial Institutions, which include central banks (S.121) and other monetary financial institutions (S.122); non-monetary financial corporations, which comprise other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); general government, which refers to the central government (S.1311) and other general government, the latter comprising state government (S.1312), local government (S.1313) and social security funds (S.1314).

The annual growth rate of the amount outstanding of *long-term* debt securities issued by euro area residents declined further from 5.8% in March to 5.6% in April 2003. The annual growth rate of *short-term* debt securities continued to increase, from 17.8% in March to 21.0% in April.

**Chart 3 – Annual growth rates of debt securities issued by euro area residents by original maturity (percentage changes)**

**Chart 4 – Annual growth rates of euro-denominated debt securities issued by euro area residents by sector of the issuer (percentage changes)**

Source: ECB Securities Issues Statistics.

The annual growth rate of the amount outstanding of euro-denominated debt securities issued by the *general government* sector declined slightly, from 5.3% in March to 5.2% in April 2003. For the *central government sector*, this growth rate fell from 4.3% in March to 4.2% in April. At the same time, for the *other general government* sector it declined from 30.7% in March to 29.0% in April (see Table 2 and Chart 4). For the *Monetary Financial Institutions (MFIs)* sector, the annual growth rate of outstanding debt securities increased from 3.9% in March to 4.2% in April. The amount of debt securities issued by *non-monetary financial corporations* grew at an annual rate of 30.3% in April 2003, compared to 30.2% in the previous month. For *non-financial corporations* this growth rate increased, from 8.9% in March to 10.5% in April.

### Quoted shares

The amount outstanding of *quoted shares* issued by euro area residents (see Table 3) totalled EUR 3,127.4 billion at the end of April 2003, which was 12.7% higher (including valuation changes) than the value at the end of March 2003 and 31.6% lower than at the end of April 2002.

*Securities issues statistics and explanations are made available on the "Euro area securities issues statistics" page in the "Statistics" section on the ECB's website (<http://www.ecb.int>). The data can be downloaded as charts (pdf files) and as csv files and are updated monthly.*

Source: ECB securities issues statistics

1) Data coverage for euro area residents is estimated at around 95% of total issuance.

2) Including items expressed in the national denominations of the euro.

3) "Short-term" means securities with an original maturity of one year or less (in accordance with the ESA 95, in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more one year away, or with indefinite maturity dates, are classified as long-term.

4) Rates of change are based on financial transactions that occur when an institutional unit acquires or disposes of financial assets and incurs or repays liabilities. The annual growth rates therefore exclude reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.
